Exercise 13.2: Viewing Logs Output

> Container standard out can be seen via the **kubectl logs** command. If there is no standard out, you would not see any output. In addition, the logs would be destroyed if the container is destroyed.

1. View the current Pods in the cluster. Be sure to view Pods in all namespaces.

```
student@cp:~$ kubectl get po --all-namespaces
```

```
NAMESPACE      NAME                                      READY     STATUS     RESTARTS    AGE
kube-system    cilium-operator-788c7d7585-jgn6s          1/1       Running    0           13m
kube-system    cilium-5tv9d                              1/1       Running    0           6d1h

....
kube-system    etcd-cp                    1/1    Running   2         44h
kube-system    kube-apiserver-cp          1/1    Running   2         44h
kube-system    kube-controller-manager-cp 1/1    Running   2         44h
kube-system    kube-scheduler-cp          1/1    Running   2         44h
....
```

2. View the logs associated with various infrastructure pods. Using the **Tab** key you can get a list and choose a container. Then you can start typing the name of a pod and use **Tab** to complete the name.

```
student@cp:~$ kubectl -n kube-system logs <Tab><Tab>
```

```
cilium-operator-788c7d7585-jgn6s
cilium-5tv9d
coredns-5644d7b6d9-k7kts
coredns-5644d7b6d9-rnr2v
etcd-cp
kube-apiserver-cp
kube-controller-manager-cp
kube-proxy-qhc4f
kube-proxy-s56hl
kube-scheduler-f-cp
traefik-ingress-controller-hw5tv
traefik-ingress-controller-mcn47
```

```
student@cp:~$  kubectl -n kube-system logs \
        kube-apiserver-cp
```

```
Flag --insecure-port has been deprecated, This flag will be removed in a future version.
I1119 02:31:14.933023       1 server.go:623] external host was not specified, using 10.128.0.3
I1119 02:31:14.933356       1 server.go:149] Version: v1.29.1
I1119 02:31:15.595131       1 plugins.go:158] Loaded 11 mutating admission controller(s)
successfully in the following order: NamespaceLifecycle,LimitRanger,ServiceAccount,
NodeRestriction,TaintNodesByCondition,Priority,DefaultTolerationSeconds,DefaultStorageClass,
StorageObjectInUseProtection,MutatingAdmissionWebhook,RuntimeClass.
I1119 02:31:15.595357       1 plugins.go:161] Loaded 7 validating admission controller(s)
successfully in the following order: LimitRanger,ServiceAccount,Priority,
PersistentVolumeClaimResize,ValidatingAdmissionWebhook,RuntimeClass,
ResourceQuota.

```
3. View the logs of other Pods in your cluster.
